SUPPLEMENTARY INFORMATION:

I. Abstract

Section 7(g) of the EAA, as amended by the Export Administration Amendments Act of 1985 (Public Law 99-64), exempts from foreign policy controls exports of donations to meet basic human needs. Since the enactment of Public Law 99-74, an exporter had to apply for a bulk Humanitarian license, permitting the export of goods identified in a supplement to the regulation without restriction as to quantity or number of shipments to any of the embargoed destinations. New License Exception procedures contained in this regulation reduce the regulatory burden on these exporters by enabling them to make humanitarian donations with only minimal recordkeeping.

SUPPLEMENTARY INFORMATION:

I. Abstract

The International Trade Administration's Office of Environmental Technologies Industries (ETI) office is the principal resource and key contact point within the U.S. Department of Commerce for American environmental technology companies. ETI's goal is to facilitate and increase exports of environmental technologies, goods and services by providing support and guidance to U.S. exporters. One aspect of increasing exports is to reduce trade barriers and non-tariff measures. ETI works closely with the Office of the U.S. Trade Representative on trade negotiations and trade liberalization initiatives. The information collected by this survey will be used to support these projects and enable ETI to maintain a current, up-to-date list of non-tariff measures that create trade barriers for U.S. exports of environmental goods and services.

SUPPLEMENTARY INFORMATION:

Authority

Issuance of permits and permit modifications, as required by the Endangered Species Act of 1973 (16 U.S.C. 1531-1543) (ESA), is based on a finding that such permits/modifications: (1) are applied for in good faith; (2) would not operate to the disadvantage of the listed species which are the subject of the permits; and (3) are consistent with the purposes and policies set forth in section 2 of the ESA. Authority to take listed species is subject to conditions set forth in the permits. Permits and modifications are issued in accordance with and are subject to the ESA and NMFS regulations governing listed fish and wildlife permits (50 CFR parts 222-226).

Those individuals requesting a hearing on an application listed in this notice should set out the specific reasons why a hearing on that application would be appropriate (see **ADDRESSES**). The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in the permit action

summaries are those of the applicant and do not necessarily reflect the views of NMFS.

Species Covered in This Notice: Sea Turtles

The following species and evolutionarily significant units (ESU's) are covered in this notice:

Green turtle (*Chelonia mydas*), Kemp's ridley turtle (*Lepidochelys kempi*), Loggerhead turtle (*Caretta caretta*).

Modification Requests Received

Permit #1201

The applicant requests a modification to Permit 1201. Permit 1201 authorizes the sampling for and collection of green, loggerhead and Kemp's ridley turtles in the estuaries of Alabama in the Northern Gulf of Mexico. The purpose of the research is to evaluate the abundance, movements, and location of juvenile sea turtles in the estuaries of Alabama, to potentially identify specific foraging areas. The presence of juvenile sea turtles in estuaries represents a potential conflict for fisheries and coastal development. However, there is little information about this issue for the estuaries of Alabama. The information from this study is critical to developing a prudent management strategy which protects sea turtles while sustaining the productivity of the fisheries. The proposed research is a prerequisite to determining if the estuaries of Alabama represent a developmental habitat for juvenile sea turtles.

The applicant proposes to: (1) Identify potential foraging areas by conducting sampling surveys, and measuring and tagging all captured turtles, (2) Perform radio tracking on some of the turtles to determine short term movements, home range, and identify foraging areas, (3) Collect samples of fecal and stomach materials in order to identify and document the diets of juvenile turtles, (4) Collect blood samples to estimate of sex ratio. Modification #1 would extend the permit expiration date from February 28, 2001 to February 28, 2003.

Dated: December 11, 2000.

Wanda L. Cain,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.
